

Press Release

Leading ISP in Ireland Chooses RADWIN 5000 Point-to-MultiPoint & RADWIN 2000 P-t-P Solutions

BBnet deploys RADWIN's solutions to provide a super fast dedicated connection to corporate customers

Tel Aviv, Israel, October 26, 2011 - RADWIN (www.radwin.com), the global provider of Backhaul and Broadband Wireless Solutions, today announced that BBnet - a leading ISP in Ireland - deployed RADWIN's Point-to-MultiPoint and Point-to-Point solutions to boost network capacity and deliver high-speed dedicated service to its corporate customers.

"Thanks to RADWIN's Point-to-MultiPoint and Point-to-Point solutions we launched a new Broadband Internet service that allows businesses to benefit from a quality Internet connection from 10 to 100 Mbps at an affordable price and with no sharing of bandwidth," said Barry O'Halloran, BBnet's Managing Director. "With more and more bandwidth-demanding applications that require uplink capacity (e.g. video conferencing) being used by businesses today, there's a need to upgrade to a higher-speed service offering. Used together, RADWIN 5000 P-t-MP and RADWIN 2000 P-t-P create a complete high-capacity wireless network solution for both last mile and backhaul applications."

Mark Sutton, Managing Director UK, Ireland & Scandinavia, stated: "ISPs such as BBnet and organizations around the world are installing our PtMP and PtP solutions to boost network capacity and benefit from a super fast, dedicated connection. BBnet is deeply committed to delivering a high quality service to customers, and we are proud that it chose RADWIN's solutions to achieve this goal."

About RADWIN 5000 Point-to-MultiPoint

The RADWIN 5000 High Capacity Point-to-MultiPoint Solution (HPMP) delivers unmatched high performance at a very competitive price. RADWIN 5000 HPMP provides 200 Mbps aggregate throughput per sector as well as dedicated bandwidth per end-user and low latency.

- Up to 200 Mbps per sector real throughput
- Long range of up to 40 kilometers
- Lowest cost per Mbps and performance
- Guaranteed SLA per Subscriber Unit
- Only Multi-Band Radio covering 4.9 – 5.8Ghz
- High Spectral Efficiency – 5Mbps per 1MHz
- OFDM/MIMO – Operates in nLOS scenarios

About RADWIN

RADWIN provides sub-6GHz wireless broadband systems that empower carriers and service providers to connect subscribers everywhere. Whether voice, data, or video streaming, the company provides wireless broadband solutions of unrivaled performance, capacity, range, and quality at the most competitive prices. Established in 1997, RADWIN has a wide installation base in over 130 countries around the world.

About BBNNet

Founded in 2005, BBNNet, based in Adare, Co Limerick and Smithstown, Shannon, Co Clare, is a leading provider of wireless broadband services in Ireland's Mid & South West Region. Specializing in the provision of cost-competitive broadband to rural areas, BBNNet was the first company to deliver reliable broadband to large parts of West Limerick, South & East Clare, and North Cork. Its broadband service is used by residential, small business and corporate customers. BBNNet uses a combination of fibre backhaul, licensed radio links and license exempt spectrum to deliver its high-quality broadband services to a growing customer base.
